Patio awnings Terrea

Make space for something great

Want to enjoy more time outdoors without compromising on a perfect sun shading system?

With the help of our innovative awning solutions, you can create an entirely new living space on your own patio for working, relaxing or playing. You can find high-grade Terrea patio awnings for every installation situation and taste in our current programme. Attractive designs and frame colours ensure you have the greatest design freedom. And the clever accessories guarantee optimum operating comfort and a real boost to your quality of life.

Our recommendation:

Der WMS Hand-held transmitter basic ideally complements our Terrea 550. Convenient operation at the press of a button. Thanks to the intelligent mesh network, even far-away products are reached – including feedback to the hand-held transmitter!

Terrea 550

Cassette awning Terrea 550

Slender cassette design

With this cassette awning, everyone can look forward to pleasant afternoons on a perfectly shaded patio. The small and compact design of the cassette perfectly matches any facade.

Brilliant extras

Drive	Motor, optional: WMS Radio motor, solar drive, crank
Colour	Powder-coated in accordance with WAREMA Colour World
Fabric	Standard/Lumera acrylic fabric, optional All Weather acrylic fabric, Perfora acrylic fabric, Soltis 92, Twilight Pearl
Installation	Wall and ceiling installation, rafter installation

- 1 Cassette
- 2 Front rail
- 3 Fabric

Cassette awning Terrea K50

Small and linear

Enjoy optimum sun shading even on the smallest of patios or balconies. This cassette awning is perfectly suited to small areas in particular and does not compromise on flexibility and design as a result. It is now also available with a valance roller blind - for undisrupted feel-good moments on your patio.

The benefits for you

- Installation possible in protected and unprotected positions thanks to closed cassette
- Flat, compact design with small dimensions
- Exclusive product design in cubic form
- Small mounting distance to wall and ceiling

Brilliant extras

- Integrated LED strips
- LED strip light rail
- Radiant heater
- WMS wind sensor
- Fabric lettering (screen printing)
- Valance roller blind with crank
- Wall connection profile with rain hood

- 1 Cassette
- 2 Front rail

Colour	Powder-coated in accordance with WAREMA Colour World
Fabric	Standard/Lumera acrylic fabric, optional All Weather acrylic fabric, Perfora acrylic fabric, Soltis 92, Twilight Pearl
Installation	Wall and ceiling installation, rafter installation

Cubic design highlight

Do you like simple design and straight lines? Then you will love this cassette awning. With its compact, rectangular construction, it fits seamlessly into cubic architectural designs with flat or mono-pitched roofs.

The benefits for you

- The cassette provides reliable protection of the awning fabric and articulated arms against dirt and weather
- Exclusive product design
- Reliably sophisticated functionality
- High-grade, stylish appearance
- Fully integrated WMS Comfort control for unbeatable comfort
- Various design options thanks to a large selection of designs and frame colours

Brilliant extras

- Valance roller blind with crank/motor or WMS Comfort control
- Integrated LED strips
- LED strip light rail
- Radiant heater
- WMS wind sensor
- Fabric lettering (screen printing)
- Wall connection profile with rain hood

Our recommendation:

With the WMS Hand-held transmitter plus you can operate our Terrea H60 with ease. 6 channels are available for this. Save individual comfort positions at the press of a button.

Terrea H60

Half-closed articulated arm awning Terrea H60

Flexibly extendable

Thanks to this articulated arm awning, you can rely on comfortable cool spaces even on hot days. Thanks to the integrated rain hood and the optional fabric bearing shell, the fabric is fully protected, even in bad weather.

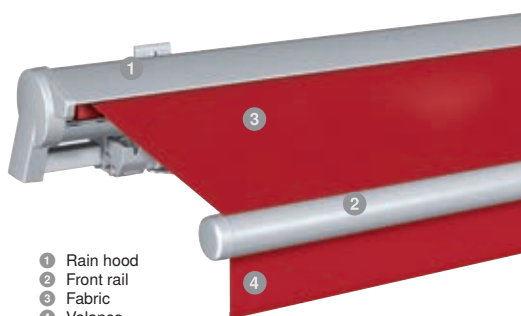

Brilliant extras

- Valance roller blind with crank/motor or WMS Comfort control
- Integrated LED strips
- LED strip light rail
- Radiant heater
- WMS wind sensor
- Fabric lettering (screen printing)
- Turning gear

The benefits for you

- Protection from above for fabric and articulated arms with the standard rain hood
- Additional fabric protection from below with the optional fabric bearing shell
- Large selection of design options
- LB model available for large projection with small awning width

Max. width	7,000 mm
Max. projection	4,000 mm
Max. inclination angle	45°
Articulated arm	Power transmission through chain/cable, optional segment
Drive	Motor, optional: WMS Radio motor, solar drive, crank
Colour	Powder-coated in accordance with WAREMA Colour World
Fabric	Standard/Lumera acrylic fabric, optional All Weather acrylic fabric, Perfora acrylic fabric, Soltis 92, Twilight Pearl
Installation	Wall and ceiling installation, rafter installation

- 1 Rain hood
- 2 Front rail
- 3 Fabric
- 4 Valance

Open articulated arm awning Terrea G60

Textile product design

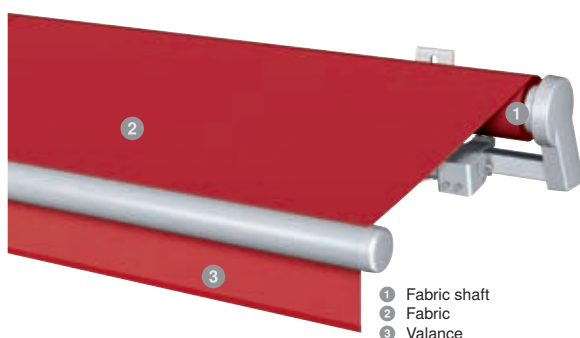

This articulated arm awning, with its distinctive textile look, ensures perfect shading even when the sun is low in the sky – thanks to the option of adjusting the inclination angle to up to 85° as well as the optional valance roller blind.

The benefits for you

- Protection against low sun by adjusting the inclination angle to up to 85°
- LB model available for large projection with small awning width

Brilliant extras

- Valance roller blind with crank/motor or WMS Comfort control
- Integrated LED strips
- LED strip light rail
- Radiant heater
- WMS wind sensor

Terrea 700S

Equipment extras

Patio awnings Terrea

Let there be light!

LED strips and light rail:

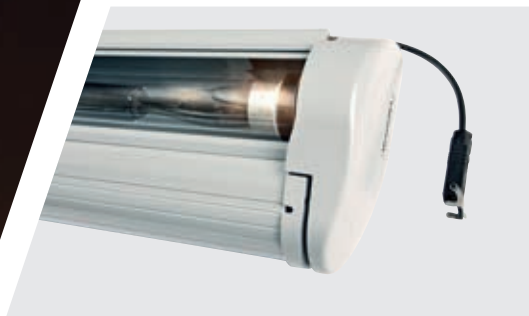

The LED strip light rails and the LED strips that can be integrated into the awning can be regulated as you wish with the WMS Dimmer.

WMS wind sensor

- Awning retracts automatically in high winds

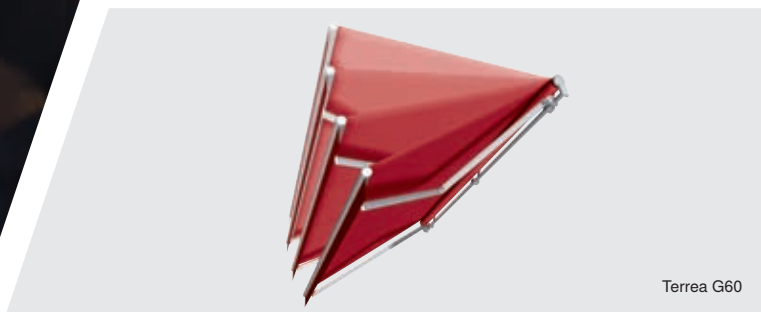

Integrated control

- WMS components already built-in ex works
- Directly integrated in the bearing tube or disappears completely in the shaft housing depending on the type of awning

Design radiant heater

- Modern, flat housing
- Housing is powder-coated, meaning it can be adapted to the colour of the sun shading product's frame
- High power with 2200 Watts
- Operation via switch or WMS Plug receiver with WMS Hand-held transmitter

Terrea G60

Turning gear

- The awning's inclination angle can be adapted to the position of the sun by simply turning the crank

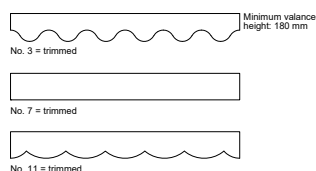

Valance roller blind

- Valance roller blind in the front rail, extending vertically
- Drive by means of crank or motor
- Convenient operation with the WMS comfort control
- Perfect protection against low-lying sun

Valance shapes

- Elegant awning closure available in three shapes, from straight to curved
- Accurate edging in different colours

Patio side screen
Undisrupted enjoyment

Low sun, nosy neighbours or a light summer breeze: not a problem with our patio side screen!

It always cuts a good figure – thanks to its sloped fabric design, it harmoniously adapts to patio awnings Terrea, pergola awnings Perea or patio roofs.

Enjoy uninterrupted moments on your patio thanks to ideal all-round shading.

Patio side screen 390

Three-way lateral protection

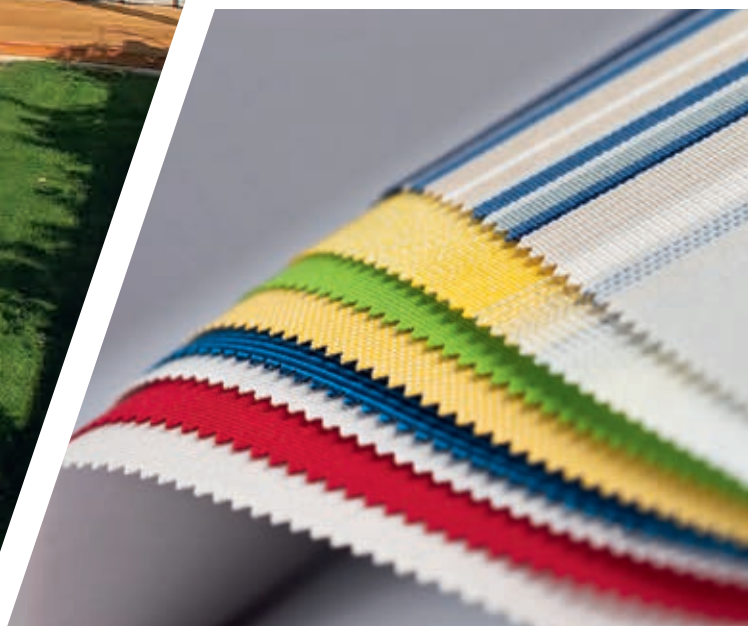

Give yourself maximum protection: against low sun, prying eyes or a balmy summer breeze. Our patio side screen can be extended simply by pulling the handle.

The benefits for you

- Lateral wind protection, sun shading and visual privacy
- The diagonal fabric adapts optimally to the patio awning, pergola awning or patio roof
- The cassette offers perfect protection for the retracted fabric
- Simple operation via handle

Equipment extras

Fabric	Standard/Lumera acrylic fabric, optional All Weather acrylic fabric, Perfora acrylic fabric, Screen, Soltis-92, Twilight Pearl
Installation	Installation of the poles on on-site foundation or ground screws, fixing of cover panels to building wall

A sunny outlook

Look forward to a perfect combination of reliable and wind-stable sun shading – for a real feel-good space on your patio. The slender design and the construction shape with straight lines, a rectangular cover panel and discreet lateral guide rails make it a real eye-catcher.

The benefits for you

- Slender and stylish design
- Modern shape matches the cubic architecture
- High wind stability
- Excellent fabric tension thanks to the reinforcement profile

Brilliant extras

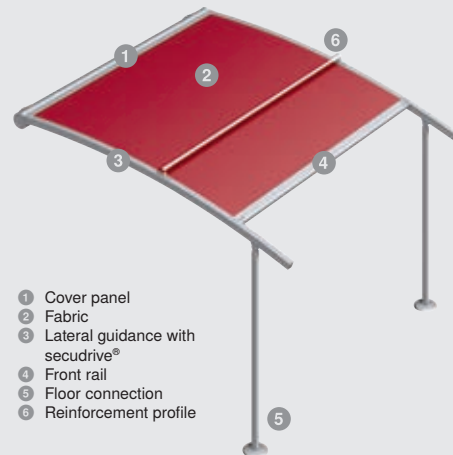

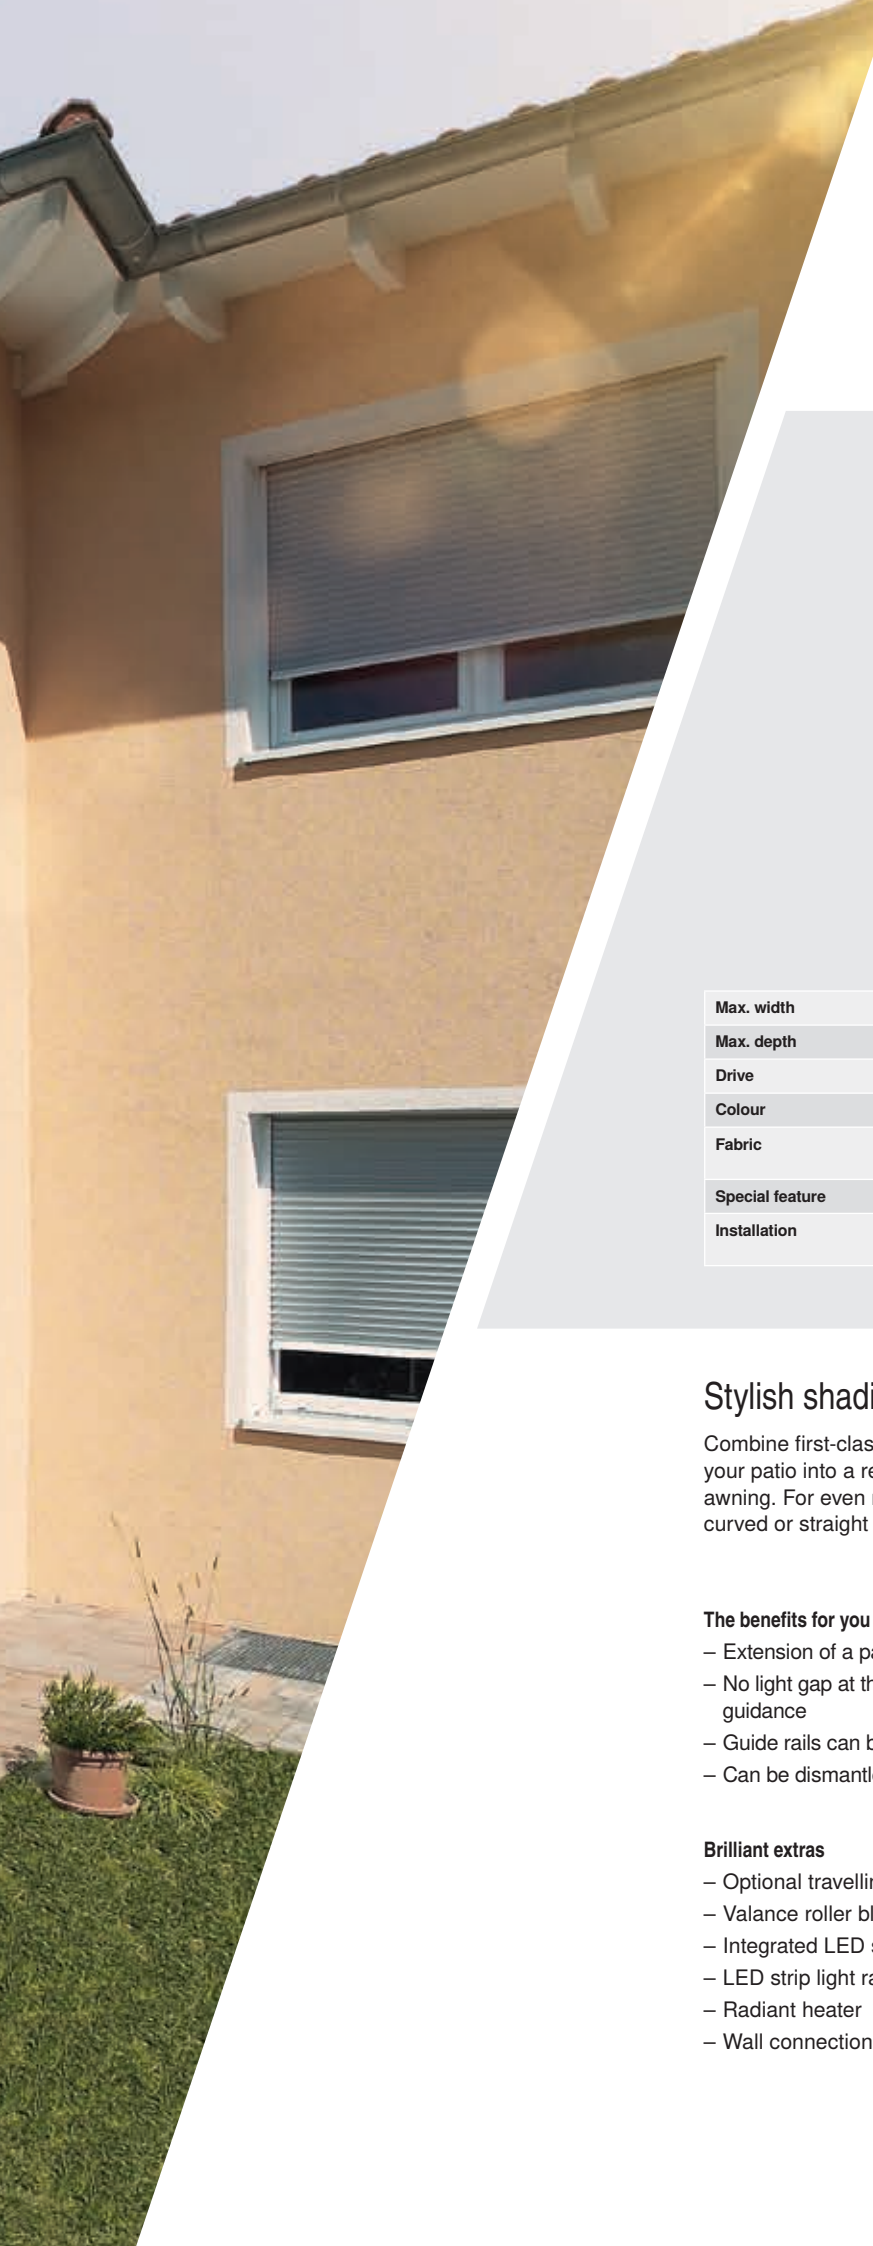

- Optional travelling reinforcement profile
- Integrated LED strips
- LED strip light rail with rectangular light rail profile
- Radiant heater
- WMS sensor system
- Multicube set
- Wall connection profile with rain hood

Pergola awning Perea P40

Our highlight:

The Perea P40 is a real eye-catcher, available as both a straight and a curved model.

Max. width	6,500 mm
Max. depth	7,000 mm
Drive	Motor, optional: WMS Radio motor
Colour	Powder-coated in accordance with WAREMA Colour World
Fabric	Standard/Lumera acrylic fabric, optional All Weather acrylic fabric, Perfora acrylic fabric, Soltis 92, Twilight Pearl
Special feature	Model with straight or curved guide rails
Installation	Installation of the poles on on-site foundation or ground screws, fixing of cover panels to building wall

Stylish shading system

Combine first-class sun shading with outstanding design and turn your patio into a real oasis of enjoyment with a Perea pergola awning. For even more individuality, you have the choice between a curved or straight guide rail. A real eye-catcher for your house!

The benefits for you

- Extension of a patio or commercial area
- No light gap at the sides thanks to the two-dimensional secudrive® guidance
- Guide rails can be straight or curved
- Can be dismantled in the winter months

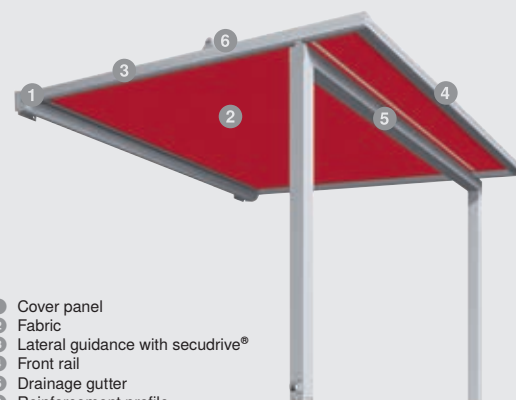

Brilliant extras

- Optional travelling reinforcement profile
- Valance roller blind with crank/motor
- Integrated LED strips
- LED strip light rail
- Radiant heater
- Wall connection profile with rain hood

Pergola awning Perea P60

Our highlight:

The innovative fabric quality W36 Rainproof textile provides perfect protection against sun and rain. The PVC grid built into the fabric ensures controlled drainage into the integrated drainage gutter.

- 1 Cover panel
- 2 Fabric
- 3 Lateral guidance with secudrive®
- 4 Front rail
- 5 Drainage gutter
- 6 Reinforcement profile

Max. width	6,000 mm
Max. projection	5,000 mm
Max. area	30 m²
Drive	Motor, optional: WMS Radio motor
Colour	Powder-coated in accordance with WAREMA Colour World
Fabric	W36 Rainproof textile
Installation	Wall, ceiling and rafter installation

Weather resistance meets slender design

This new rainwater-proof Perea awning means you are independent of the elements and allows you to use nature as an additional open space. A PVC grid built into the fabric enables controlled water drainage into the integrated drainage gutter.

The benefits for you

- Slender appearance
- Controlled drainage
- Weather-resistant and rainwater-proof fabric for a pleasant climate under the awning
- No light gaps at the sides between the fabric and guide rail thanks to the secudrive® guide

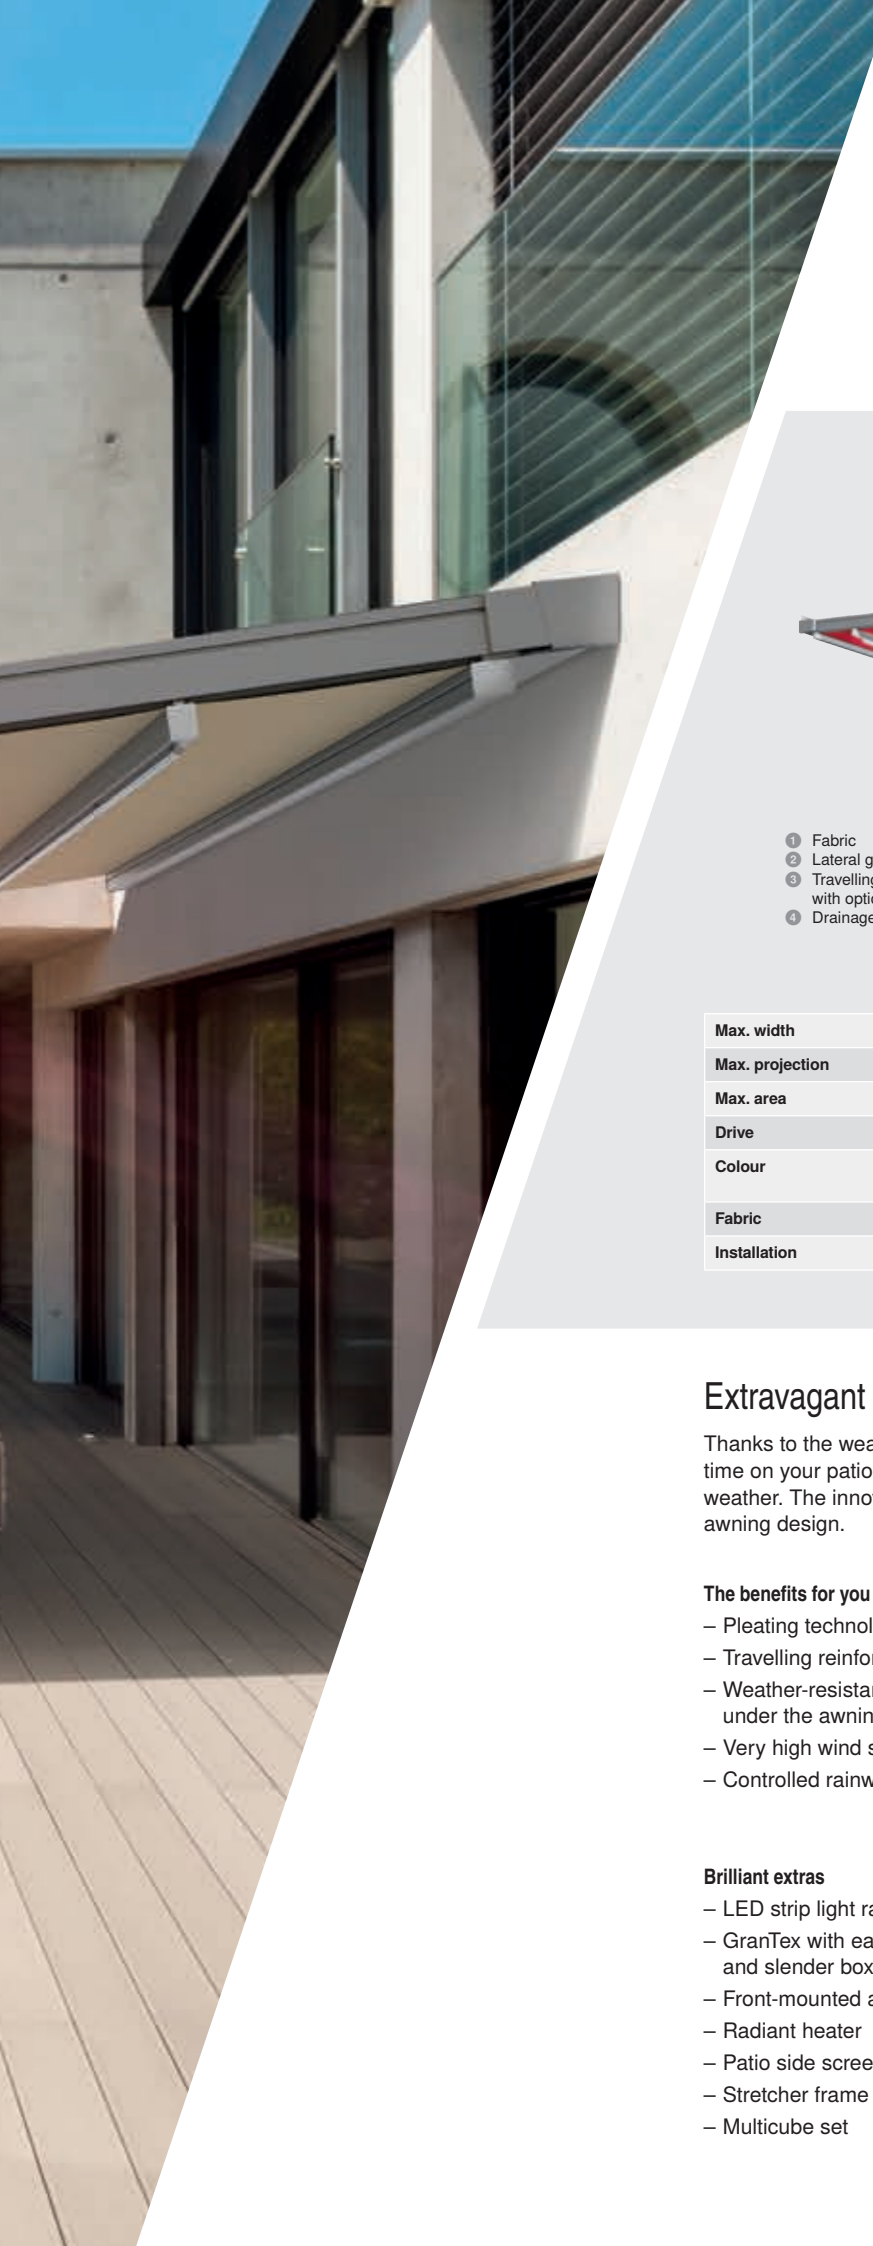

Brilliant extras

- Front-mounted awnings with easyZIP guidance for vertical shading
- GranTex with easyZIP guidance for vertical shading for large widths and slender boxes
- Integrated LED strips
- LED strip light rail
- Radiant heater
- Patio side screen
- Multicube set
- Stretcher frame
- Wall connection profile with rain hood

Pergola awning Perea P70

Our highlight:

The Perea P70 is extremely wind-stable and even withstands stormy weather. The travelling reinforcement profiles ensure very good tension of the weather-resistant and rainwater-proof fabric.

- 1 Fabric
- 2 Lateral guidance
- 3 Travelling reinforcement profiles with optional LED strip light rails
- 4 Drainage gutter

Max. width	6,000 mm
Max. projection	6,000 mm
Max. area	36 m ²
Drive	Motor
Colour	Powder-coated in accordance with WAREMA Colour World
Fabric	Soltis W96 Rainproof textile
Installation	Wall installation

Extravagant weather protection

Thanks to the weather-resistant Perea awning, you can spend more time on your patio - whether it be in the evening hours or during bad weather. The innovative pleating technology provides an extravagant awning design.

The benefits for you

- Pleating technology for attractive appearance
- Travelling reinforcement profiles ensure very good fabric tension
- Weather-resistant and rainwater-proof fabric for a pleasant climate under the awning
- Very high wind stability
- Controlled rainwater drain

Brilliant extras

- LED strip light rails on the reinforcement profiles
- GranTex with easyZIP guidance for vertical shading for large widths and slender boxes
- Front-mounted awnings with easyZIP guidance for vertical shading
- Radiant heater
- Patio side screen
- Stretcher frame
- Multicube set

Equipment extras

Pergola awnings Perea

Design radiant heater

- Modern, flat housing
- Housing is powder-coated, meaning it can be adapted to the colour of the frame
- High power with 2200 Watts
- Operation via switch or WMS Plug receiver with WMS Hand-held transmitter

Integrated lighting

- Integrated LED strips
- Available with WMS Dimmer
- For Perea P20, P40 and P60

Multicube

- Concrete foundation not strictly necessary
- Pole fixing without screw connection in the substructure
- Practical additional seating option
- Colour of the steel basket can be customised in accordance with the WAREMA Colour World
- Choice of filling (on-site), since the steel basket is supplied empty
- Available colours for wooden seating: dark brown, grey, anthracite

Front-mounted awnings with easyZIP guidance

- Vertical shading with Perea P60 and P70
- Large design selection
- Particularly stable and strong hold thanks to zipper system

GranTex with easyZIP guidance

- Vertical shading with Perea P60 and P70
- Uniform fabric appearance for units with a greater width and a slender box
- Fabric shaft support for added stability with units up to 6 m wide

Slat roofs Lamaxa

Stylish living spaces of your dreams

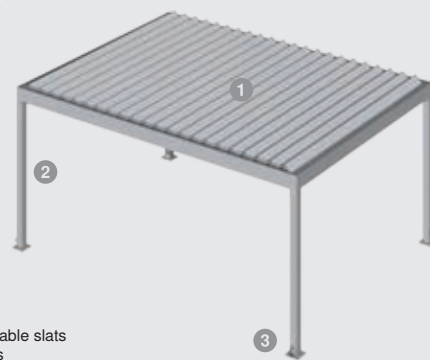

Looking for a well-designed shading solution for your open space that also provides protection from rain?

Our new beautiful Lamaxa slat roofs make this possible. Look forward to an exclusive product that opens up plenty of room for your individual design wishes thanks to a wide range of colours. The well thought-out design provides safe sun and weather protection at the same time. Exactly where you need it. The stable slats can be flexibly turned as well as extended and retracted. This way you can enjoy as much sun as you like and, even if it rains, you can still enjoy your open space.

Enjoy life outdoors to the fullest and make the most of nature.

Slat roof Lamaxa L50

- 1 Pivotal slats
- 2 Poles
- 3 Water drain

Max. width	4,500 mm
Max. projection	6,000 mm
Drive	WMS Radio motor
Colour	Powder-coated in the fine texture surface quality in accordance with the WAREMA Colour World
Installation	Free-standing, optional wall connection

A stylish oasis of well-being

Enjoy reliable protection against sun, wind and rain on your patio the whole year round. The robust slat roof impresses with its slender shapes and guarantees the highest level of user comfort thanks to pivotable slats. A large selection of innovative extras ensures maximum individuality. For a real boost to quality of life!

The benefits for you

- Slender design
- Free-standing or mounted to the wall
- Motor perfectly integrated in the slat
- Sunlight can be individually adjusted with slat tilting
- Removable leaf catcher in the corner areas of the crossbeams

Brilliant extras

- Innovative accessory options such as LED strips integrated in the slats, all-round lighting (direct and/or indirect)
- LEDs attached to the pole
- Dimmable RGB lighting as indirect version
- GranTex with easyZIP guidance for a vertical shading solution
- Glass, wooden or aluminium sash frames as lateral visual privacy and weather protection
- Radiant heater
- Optional protection profile for a shapely closure between the crossbeam and slat and for protection from splash water

reddot winner 2021

Our recommendation:

Control the slat tilting for the Lamaxa comfortably via smartphone or with the WMS WebControl pro.

www.warema.com/webcontrol

Lamaxa L60

Slat roof Lamaxa L60

All-round weather-resistant protection

The slat roof Lamaxa L60 gives you exactly the right amount of sun for your favourite spot in the garden. Thanks to the practical slat tilting, you can control how much sun you get. When the slats are closed, the slat roof offers reliable protection against rain.

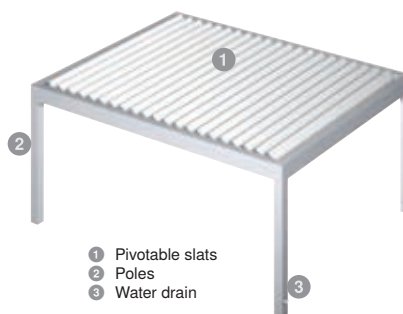

Brilliant extras

- Integrated awnings with easyZIP guidance for vertical shading
- Glass, wooden or aluminium sash frames for lateral visual privacy and/or weather protection
- Dimmable LED strips in the horizontal or vertical area, direct and/or indirect
- RGB lighting as an indirect lighting option

The benefits for you

- Free-standing or mounted to the wall
- Can be used flexibly
- Radiant heater
- Sunlight can be individually adjusted with slat tilting
- Reliable weather protection when slats are closed
- Alternatively with additional pole to create a clear throughhole
- Optionally with an offset pole to create a roof overhang

Max. width	4,750 mm
Max. projection	6,330 mm
Slats	Slats are pivotable
Drive	WMS Radio motor
Frame colour	Powder-coated in the fine texture surface quality in accordance with the WAREMA Colour World
Installation	Free-standing, optional wall connection

- 1 Pivotable slats
- 2 Poles
- 3 Water drain

Slat roof Lamaxa L70

A dreamy retreat

The slat roof Lamaxa L70 is your haven for relaxing in the sunshine – but also when it's raining and you still want to spend your time outdoors. The advantage of the Lamaxa L70: the slats can be tilted, and retracted and extended, by remote control.

The benefits for you

- Free-standing or mounted to the wall
- Slats can be tilted and moved at the press of a button
- Can be adjusted to the position of the sun
- You can relax in comfort under the Lamaxa L70 during bad weather

- ① Pivotal and manoeuvrable slats
- ② Poles
- ③ Water drain

Brilliant extras

- Integrated awnings with easyZIP guidance for vertical shading
- Radiant heater
- Dimmable LED strips in the horizontal or vertical area, direct and/or indirect
- RGB lighting as an indirect lighting option
- Glass, wooden or aluminium sash frames for lateral visual privacy and/or weather protection
- Alternatively with additional pole to create a clear throughhole
- Optionally with an offset pole to create a roof overhang

Max. width	4,750 mm
Max. projection	6,330 mm
Slats	Slats are pivotable and manoeuvrable
Drive	WMS Radio motor
Frame colour	Powder-coated in the fine texture surface quality in accordance with the WAREMA Colour World
Installation	Free-standing, optional wall connection

Lamaxa Series-mounted unit

Slat roof Lamaxa Line

Full flexibility

Outdoor family celebrations can now go off without a hitch, even if the weather isn't playing ball. Because the Lamaxa slat roof is now also available as a series-mounted unit. This means two units can be positioned on one central pole. For celebrations with no limitations.

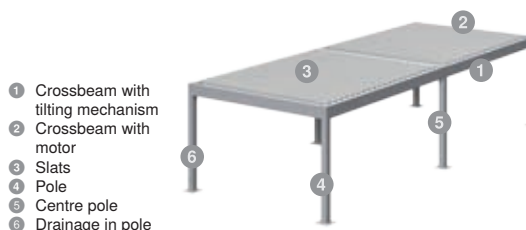

The benefits for you

- For shading very large vertical areas
- Available for Lamaxa L60 and L70
- Free-standing or mounted to the wall
- Slat tilting and/or moving at the press of a button
- The Lamaxa Line can be linked along the length and the width
- A combination of L60 and L70 provides perfect flexibility

Brilliant extras

- Integrated awnings with easyZIP guidance for vertical shading
- Radiant heater
- Dimmable LED strips in the horizontal or vertical area, direct and/or indirect
- RGB lighting as an indirect lighting option
- Glass, wooden or aluminium sash frames for lateral visual privacy and/or weather protection
- Optionally with additional pole to create a clear through-hole

Max. width	4,500 mm / 9,000 mm
Max. projection	12,000 mm / 6,000 mm
Slats	Slats are pivotable and/or manoeuvrable
Drive	WMS Radio motor
Frame colour	Powder-coated in the fine texture surface quality in accordance with the WAREMA Colour World
Installation	Free-standing, optional wall connection

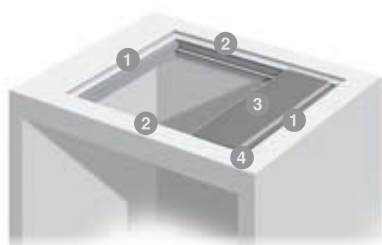

Slat roof Lamaxa Free

Unrestricted view

The Lamaxa Free makes way for brand new design options. The stylish design enables an unrestricted view outside as it does not need any poles. The Lamaxa Free is installed in existing structures, such as concrete rings. This means it can be fully integrated or mounted from above. These variants are available for the products Lamaxa L60 and L70.

- 1 Crossbeams with motor
- 2 Crossbeams with tilting mechanism
- 3 Slats (retracted)
- 4 Drainage

The benefits for you

- Free design options
- Can be taken into consideration when planning your home
- Architectural design element

Slat roofs Lamaxa

Vertical shading systems

L60 and L70:

- Integrated awnings with easyZIP guidance
- High wind stability and a steady hold thanks to the zipper system

L50:

- GranTex with easyZIP guidance and zipper system as ideal visual privacy, sun shading and wind protection
- Guide rails and cover panel perfectly integrated into the Lamaxa L50

Sash frames

- Elegant glass sliding systems
- Wood or aluminium sliding shutters
- Can be conveniently ordered together with the Lamaxa slat roof

LED/RGB lighting

L60/L70:

- LED lighting integrated into the crossbeams (directly and/or indirectly) or in the pole
- RGB lighting as an indirect lighting option
- LED strip lighting can be individually adjusted via dimmer

L50:

- Dimmable LED lighting integrated into the slats or as all-round lighting (indirect and/or direct)
- LED lighting attached to the pole
- RGB lighting as an indirect lighting option

Additional pole

L60/L70:

- With an additional pole, the slat roof can be conveniently extended, e.g. to create an additional throughhole
- With the integration of easyZIP awnings, a free throughhole can be created

Offset pole

L60/L70:

- Creates a roof overhang to cover adjacent objects such as pools
- More flexible positioning of the corner pole for more free space

Conservatory awnings Climara

Pleasant ambience

Do you want to be able to spend the whole year relaxing in your conservatory and enjoying the view of nature?

With conservatory awnings Climara you can feel good all the time, while being perfectly protected from the sun when necessary. Depending on your requirements, we offer optimal sun shading, visual privacy and glare control – whether it be for classic conservatories, individual architectural solutions with large glass surfaces or patio roofs. Thanks to the variety of designs, colours and many extras, you can design your sun shading system to perfectly fulfil your wishes.

Transform your home into your own feel-good oasis with WAREMA!

Our recommendation:

The optional valance roller blind ensures reliable protection in the vertical area of the Climara W10. Low sun, windy draughts or neighbours' prying eyes are therefore a thing of the past. It can be operated easily using the WMS radio system if desired

Climara W10

Conservatory awning Climara W10

Full shading

Enjoy the four seasons in your conservatory and always be perfectly protected thanks to your conservatory awning. The conservatory awning Climara W10 is mounted internally or under glass. Thanks to the secudrive® guidance technology you will experience shading without a light gap between the awning fabric and guide rail. We are keeping up with the trend for clean shapes with our new cubic cover panel.

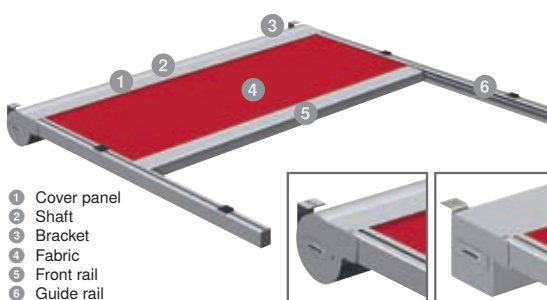

Brilliant extras

- Valance roller blind
- Integrated LED strips
- LED strip light rail
- Rectangular cover panel alternatively as cubic design
- Direction of movement "from bottom to top" also possible
- Noise optimised motor for even quieter movement behaviour

Max. width	6,500 mm
Max. projection	6,000 mm
Max. area	30 m ²
Drive	Motor, optional: WMS Radio motor
Colour	Powder-coated in accordance with WAREMA Colour World
Fabric	Standard/Lumera acrylic fabric, optional Perfora acrylic fabric, Soltis-92, Screen, Twilight Pearl
Installation	Installation under glass or internally Installation possible using brackets with different spacings

The benefits for you

- Versatile, modern sun protection in or under glass
- Shading without light gaps between awning fabric and guide rail thanks to secudrive®
- Flat and compact design
- Round or rectangular cover panel shape available

- 1 Cover panel
- 2 Shaft
- 3 Bracket
- 4 Fabric
- 5 Front rail
- 6 Guide rail

Conservatory awning Climara W20

Wind-stable professional

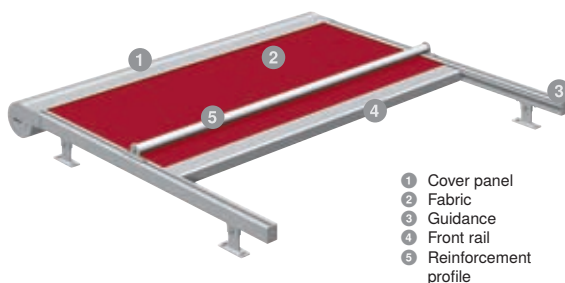

With this external conservatory awning you can effectively keep the heat out during summer and spoil yourself with warming sunrays in the winter. Thanks to the innovative secudrive® guidance, there is no incidence of light between the fabric and guide rail and a high wind stability is guaranteed. Optionally also available with a rectangular panel system.

The benefits for you

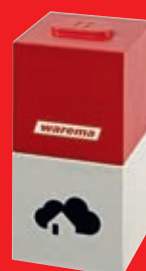

- Reliable heat protection and sun shading for a pleasant indoor climate
- Flat and compact design
- Good fabric tension thanks to secudrive® guidance
- No incidence of light between fabric and guide rail
- High wind stability
- Optional rectangular cover panel with matching rectangular reinforcement profile
- Mutual interlocking with ventilation wing

Brilliant extras

- Direction of movement "from bottom to top" also possible
- WMS sensor system incl. integrated weather station

Max. width	6,500 mm
Max. projection	6,000 mm
Max. area	30 m²
Drive	Motor, optional: WMS Radio motor
Colour	Powder-coated in accordance with WAREMA Colour World
Fabric	Standard/Lumera acrylic fabric, optional All Weather acrylic fabric, Perfora acrylic fabric, Soltis-92, Screen, Twilight Pearl
Installation	External installation Installation possible using brackets with different spacings

Our recommendation:

Operate the entire home (sun shading, light, heating and more, from different manufacturers) via just one app. With WMS homee, you always have an overview of all devices and can comfortably operate these from anywhere, even by voice control.
www.warema.com/homee

Climara W9

Conservatory awning Climara W9

Sophisticated functionality

Experience a real "outdoor feeling" in your conservatory – perfectly protected from unpleasant weather. The functionally sophisticated Climara W9 is particularly easy to install under glass.

Brilliant extras

- Valance roller blind with crank

The benefits for you

- Fully developed and tried and tested back-pull principle
- Simplified installation
- Internal shading for large areas

Max. width	6,000 mm
Max. projection	6,000 mm
Max. area	30 m ²
Drive	Motor, optional: WMS Radio motor
Colour	Powder-coated in accordance with WAREMA Colour World
Fabric	Standard/Lumera acrylic fabric, optional Perfora acrylic fabric, Soltis-92, Twilight Pearl
Installation	Installation under glass or internally Installation possible using brackets with different spacings

Conservatory awning Climara W19

Ideal protection

Just sit back and enjoy. Use your conservatory as your personal relaxation haven. It is perfectly equipped with the Climara W19. The long-lasting back-pull principle is now given additional protection with a brush seal and is thus even more reliable than before.

The benefits for you

- External wind-stable shading
- Long-lasting and proven back-pull principle in a new design
- Direction of movement "from bottom to top" also possible
- Perfect combination with the Climara D3

Max. width	6,000 mm
Max. projection	6,000 mm
Max. area	30 m ²
Drive	Motor, optional: WMS Radio motor
Colour	Powder-coated in accordance with WAREMA Colour World
Fabric	Standard/Lumera acrylic fabric, optional Perfora acrylic fabric, Soltis-92, Twilight Pearl
Installation	Installation over glass, externally using brackets with different spacings

Climara W19

Conservatory awning Climara W7

Discreet all-rounder

With Climara awnings, you can enjoy your personal "outdoor feeling" 365 days a year – perfectly protected in your own home. Thanks to its direct installation on the conservatory profile, the Climara W7 model is integrated in a particularly unobtrusive way.

The benefits for you

- Unobtrusive fixing by means of direct installation of the guide rails on the conservatory profile
- Perfect sun shading for individually designed conservatories
- Lateral protrusion of the fabric beyond the guide rails facilitates optimal shading, even in hipped or sloped conservatories
- Optimum fabric tension thanks to gas pressure springs in the guide rails

Max. width	6,000 mm
Max. projection	4,500 mm
Max. area	24 m²
Drive	Motor
Colour	Powder-coated in accordance with WAREMA Colour World
Fabric	Standard/Lumera acrylic fabric, optional All Weather acrylic fabric, Perfora acrylic fabric, Soltis 92
Installation	External installation Installation directly on the conservatory profiles

- 1 Cover panel
- 2 Fabric
- 3 Guidance
- 4 Front rail

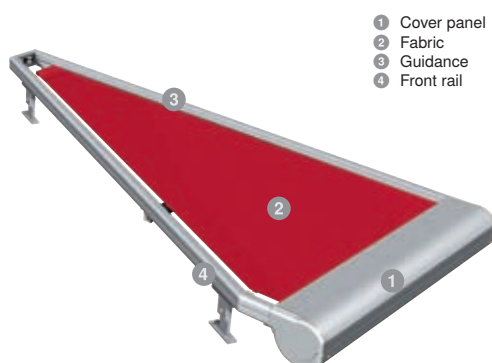

Conservatory awning Climara D3

Individuality right down to the last detail

Do you place great importance on individuality when it comes to your conservatory? We offer a customised solution for almost any requirement. The Climara D3 is perfectly suited to shading triangular windows. Create a vibrant space for well-being.

The benefits for you

- Versatile design options
- Tried and tested technology for long-lasting joy with your awning
- Perfect combination with the WAREMA conservatory awning W19
- Versatile installation on trapezoidal or triangular glass surfaces

Max. width	4,000 mm
Max. projection	5,000 mm
Max. area	10 m ²
Drive	Motor, optional: WMS Radio motor
Colour	Powder-coated in accordance with WAREMA Colour World
Fabric	Standard/Lumera acrylic fabric, optional Perfora acrylic fabric, Soltis-92, Twilight Pearl
Installation	External installation Installation possible using brackets with different spacings

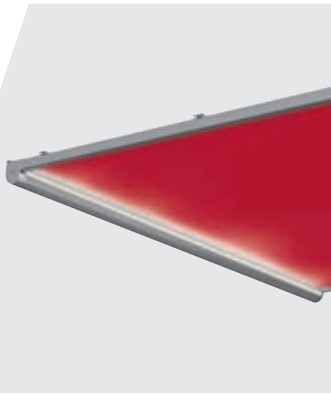

Climara D3

Equipment extras

Conservatory awnings Climara

LED strip light rail

- Available with WMS Dimmer (LED)
- Only available for Climara W10
- Suitable for the W10 with rectangular cover panel shape now also with a rectangular LED strip light rail profile

Sun sails Sonea

Aesthetic lightness

Would you like to create your personal space in the shade outdoors without compromising on a light look and the highest level of comfort?

Make your summer dreams come true with our elegant Sonea sun sails and transform your garden or patio into a unique oasis of well-being. Our stylish shading solutions offer you limitless design variety and maximum comfort. For a considerable improvement in quality of life.

Enjoy the sunny side of life – with WAREMA.

Sonea 40

Sun sails

Sonea S40

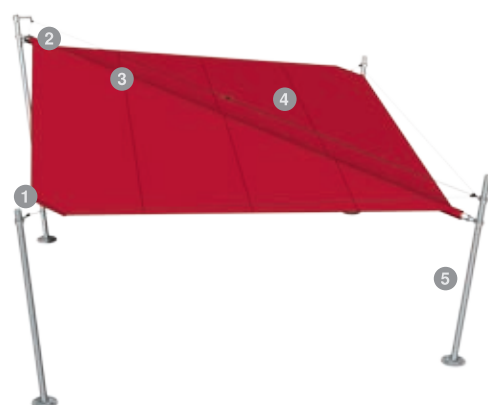

Flexible shady spot

Treat yourself to a holiday in your garden. Our light sun sail impresses with its characteristic square fabric shape and offers the perfect combination of modern design and high-grade shading – no matter whether free-standing or mounted on the wall. The crank operation makes it easy to extend and retract – without a power supply or needing to install lines.

The benefits for you

- Stylish aesthetics and maximum comfort
- Safe and convenient operation
- The sail extends and retracts easily thanks to the practical single-point operation with crank drive
- Optional height adjustment for the fabric's lowering mechanism offers protection when the sun is low
- Clean line guidance and particular stability thanks to the cable deflection (black)

Max. width	9,000 mm
Max. extension per side	4,500 mm
Drive	Crank
Colour	Powder-coated in accordance with WAREMA Colour World, poles optionally in stainless steel
Fabric	Standard/Lumera acrylic, Perfora acrylic fabric

- 1 Traction cable
- 2 Crank connection with cable winder
- 3 Fabric shaft
- 4 Fabric
- 5 Pole

Sun sails

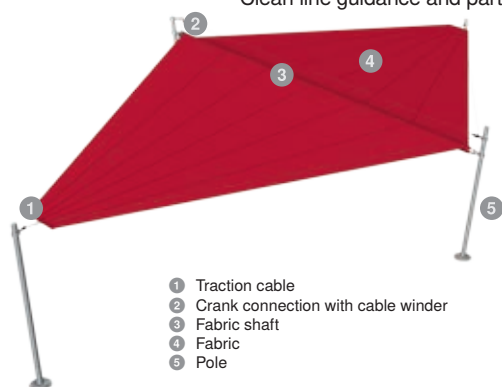

Sonea S50

Shading at its best

Make your summer dreams come true at home. The airy and elegant sun sail impresses with its stability, a convenient crank operation and the radial fabric cut – an extraordinary design element and a real eye-catcher. For that certain something on the building wall or in the garden.

The benefits for you

- Available both with symmetrical and asymmetrical fabric
- Fabrics available in triangular shape
- Flexible fixing possible, even on the building wall
- Stable pole for open spaces, powder-coated in accordance with the WAREMA Colour World in a stainless steel design
- Optional height adjustment for the fabric's lowering mechanism offers protection when the sun is low
- Ideal for shading large areas
- Clean line guidance and particular stability thanks to the cable deflection (black)

Max. width	9,000 mm
Max. extension per side	6,500 mm
Drive	Crank
Colour	Powder-coated in accordance with WAREMA Colour World or poles in stainless steel
Fabric	Standard/Lumera acrylic, Perfora acrylic fabric

Sun sails

Sonea S70

Stylish design highlight

Relax in style with sun shading: the compact sun sail impresses with a light and modern look, a variety of design options and well thought-out details. For example, technical components such as the motor are completely hidden within the fabric shaft. A real eye-catcher for your garden and patio.

The benefits for you

- Available both with symmetrical and asymmetrical fabric
- Fabrics also in triangular shapes
- Excellent design for gardens and patios
- Optional height adjustment for the fabric's lowering mechanism offers protection when the sun is low
- Poles optionally available in stainless steel
- Wall connection possible
- WMS Weather station for automatic fabric retraction when the weather changes
- Clean line guidance and particular stability thanks to the cable deflection (black)

reddot winner 2021

Equipment extras

Sun sails Sonea

Poles in stainless steel

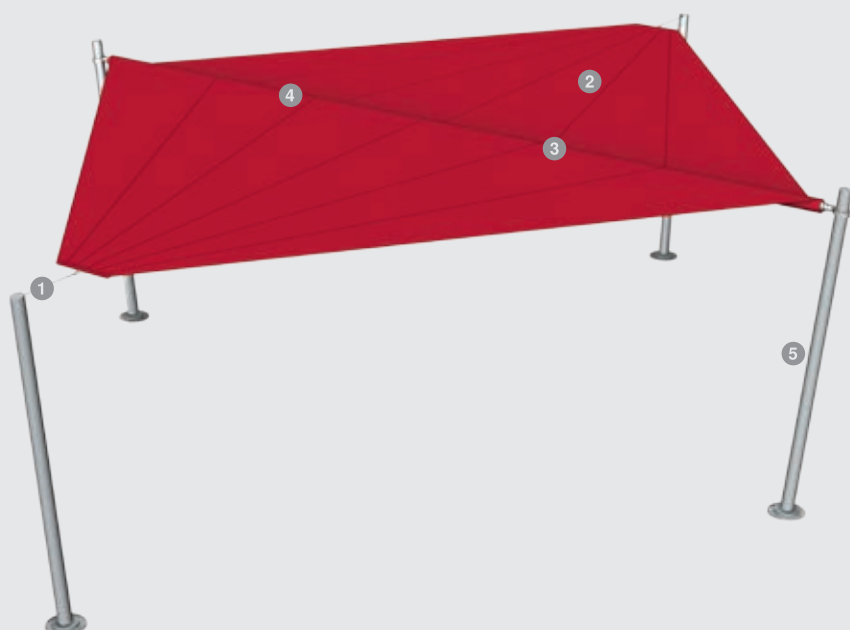

- Optional wall console with matching cover panel to attach the sail to the wall

Height adjustment

- Thanks to the optional height adjustment, the fabric can be lowered and offers protection when the sun is low
- Easy manual operation
- Ideal for west-facing patios

WMS Weather station

- Fabric retracts automatically in high winds
- Convenient operation with a WMS Hand-held transmitter or via smartphone with WMS WebControl pro
- Only available for Sonea S70

- 1 Traction cable
- 2 Fabric
- 3 Shaft
- 4 Motor
- 5 Pole

Max. width	9,000 mm
Max. extension per side	6,500 mm
Drive	Motor with WMS Plug receiver
Colour	Powder-coated in accordance with WAREMA Colour World, poles optionally in stainless steel
Fabric	Standard/Lumera acrylic fabric, optionally Perfora acrylic fabric

Insect screen

Undisrupted well-being

Do you want to enjoy the balmy summer air while relaxing in your home?

Then keep troublemakers like mosquitoes, wasps and even pollen and fine dust outside. With our innovative insect screen and pollen protection solutions, you can relax and breathe easy at all times. Whether for windows, patio doors or integrated into sun shading systems, the elegant and extremely stable systems are suitable for any application and are also available in special shapes. Special fabric variants are sure to fulfil all wishes for a perfect view out or even reliable protection against pollen or fine dust.

For more fun in the summer and a boost to your quality of life – with WAREMA insect and pollen screens.

Our recommendation:

Insect screen roller blinds can be perfectly combined with WAREMA external venetian blinds or roller shutters. They can be integrated very practically and can be operated using a handle rail.

Insect screen roller blind

Insect screen roller blind

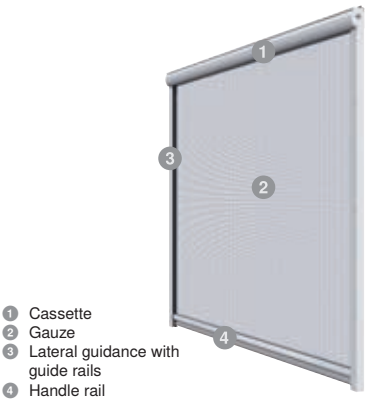

Flexible protection against insects

A breath of fresh air is always welcome in stuffy loft spaces - but not annoying insects, which only need a small window gap to enter. The fixed insect screen roller blind provides the ideal solution for this purpose. The insect screen roller blind can be installed vertically on both conventional windows and doors and on roof slopes.

The benefits for you

- Securely mounted, ready for use at any time
- Soft-raise function for smooth and controlled raising of the sun shading product
- Easy closing by engaging into the special labyrinth lock
- Wind-stable thanks to lateral fixing of the gauze using brush seals in the guide rails

Max. width	2,000 mm
Max. height	2,400 mm
Max. area	4.8 m²
Operation	Manual with handle rail, driven by integrated spring-loaded shaft
Gauze	WAREMA VisionAir gauze
Cassette and guide rails	Aluminium, extruded, surface powder-coated
Fields of application	Vertical windows and doors, (roof) slopes and skylights
Installation	In the reveal, suitable for all window frames, for installation on window frames, only for flush or offset windows without protruding water drips

Insect screen

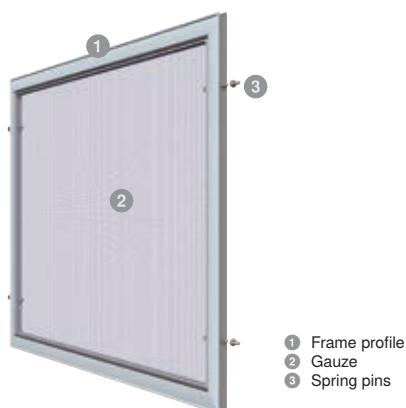

Fixed frame

Practical year-round solution

Air your rooms thoroughly, even on warm summer evenings, and look forward to a restful sleep without pesky mosquitoes or moths. The stable and securely mounted insect screen fixed frame adapts to any window thanks to its discreet appearance. The optional brush seal closes every last loophole.

The benefits for you

- For a great variety of windows (even those with sloped window sill)
- For use in sloped areas, e.g. on skylights
- Securely mounted and therefore very stable
- Suitable for retrofitting
- Rectangular and round special shapes are available (depending on type)
- Inward alignment of the gauze possible (depending on type)

Max. width	3,000 mm
Max. height	3,000 mm
Max. area	4.5 m²
Operation	Securely mounted to the window
Gauze	WAREMA VisionAir gauze, WAREMA VisionAir pollen protection gauze, WAREMA VisionAir fine dust gauze, wear-resistant gauze, stainless steel gauze
Frame profile	Aluminium, extruded, surface powder-coated
Fields of application	For windows which are only opened for ventilation, windows in special shapes
Installation	Tightly screwed to the reveal, with spring pins in lateral fixing holes, for suspension using adjustable or spring-loaded corner plates on flush and offset windows (no on-site installation), with fixing bracket or rails for flush and offset windows

Insect screen swivel door

Insect screen Swivel door

Reliable protection

Insect screens and pollen protection for patio and balcony doors guarantee unlimited enjoyment. The magnetic catch for the insect screen swivel door seals reliably and the kick profile also protects the lower section of the gauze.

The benefits for you

- Closes reliably and tightly thanks to the magnetic catch and integrated closing aid
- Kick profile in the lower section protects the gauze
- Cross rail with integrated handle rail for reinforcement
- Flexible operation from inside or outside
- Pet door can be integrated

Max. width	1,300 mm / wing
Max. height	2,500 mm / door wing; 1800 mm / window wing
Max. area	2.5 m ² / wing
Operation	Operated by handle rail. Closes with integrated closing aid and magnetic catch
Gauze	WAREMA VisionAir gauze, WAREMA VisionAir pollen protection gauze, WAREMA VisionAir fine dust gauze, wear-resistant gauze, stainless steel gauze
Frame profile	Aluminium, extruded, surface powder-coated
Models	One or two wings
Fields of application	Passages to a balcony or patio, windows and doors which are opened often, windows and doors with one or two wings, special shapes, for sloped exits and/or window sills
Installation	With mounting frames on three or all four sides, without mounting frame on window or door frame

- 1 Frame profile
- 2 Gauze
- 3 Hinge
- 4 Sash bar with integrated handle rail
- 5 Step profile

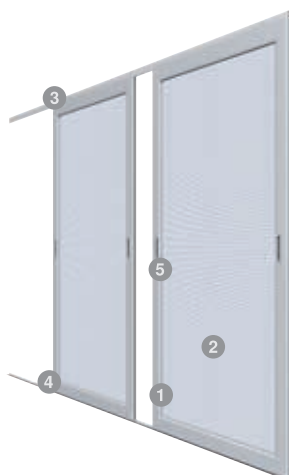

Insect screen Sliding door

Space-saving solution

Whether inside or outside, look forward to a relaxed summertime - completely secure against unwelcome troublemakers. The insect screen sliding door takes up very little space as it slides along the wall and is available as a one-wing or two-wing model for large glass surfaces.

The benefits for you

- Ideal for large areas
- Flexible operation from inside or outside using a handle shell on the inside and outside
- Comfortable solution that takes up little space

- 1 Frame profile
- 2 Gauze
- 3 Running profile
- 4 Running rail
- 5 Handle shell

Max. width	2,100 mm / wing
Max. height	3,000 mm / wing
Max. area	6 m ² / wing
Operation	Manual sliding of the frame
Gauze	WAREMA VisionAir gauze, WAREMA VisionAir pollen protection gauze, WAREMA VisionAir fine dust gauze, wear-resistant gauze, stainless steel gauze
Frame profile	Aluminium, extruded, surface powder-coated
Models	One or two wings
Fields of application	Passages to conservatories, patios, balconies or glazed facade sections, one-wing and two-wing windows and doors
Installation	With a surrounding mounting frame on or in the reveal, in rails, guided by base, wall or U-shaped profiles, directly on the wall or in a recess

Insect screen pleated blind

Insect screen Pleated blind

Effective in even the smallest space

You can effectively protect yourself from annoying insects, even on small balconies or patios. The insect screen pleated blind can be moved crosswise and disappears into the frame to save space.

The benefits for you

- Horizontally movable insect screen pleated blind slides into the frame to save space
- Flexible operation on room side and facade side by means of integrated handle rail
- Operation at any height

Max. width	2,200 mm
Max. height	2,600 mm
Max. area	5.7 m²
Operation	Manual sliding of the insect screen pleated blind
Gauze	Pleated
Aluminium parts	Fields of application: in the reveal, on an even substructure

- 1 Upper guide rail
- 2 Base profile
- 3 Lateral end profile
- 4 Sash profile
- 5 Gauze

Insect screen Swinging door

Completely secure

Insect screen and pollen protection from WAREMA offers convenient operation and effective protection in one. The insect screen swinging door is easy to operate - even if you do not have a free hand. It automatically swings back to the starting position.

- 1 Frame profile, mounting frame
- 2 Gauze
- 3 Sash bar with integrated handle rail
- 4 Kick profile

The benefits for you

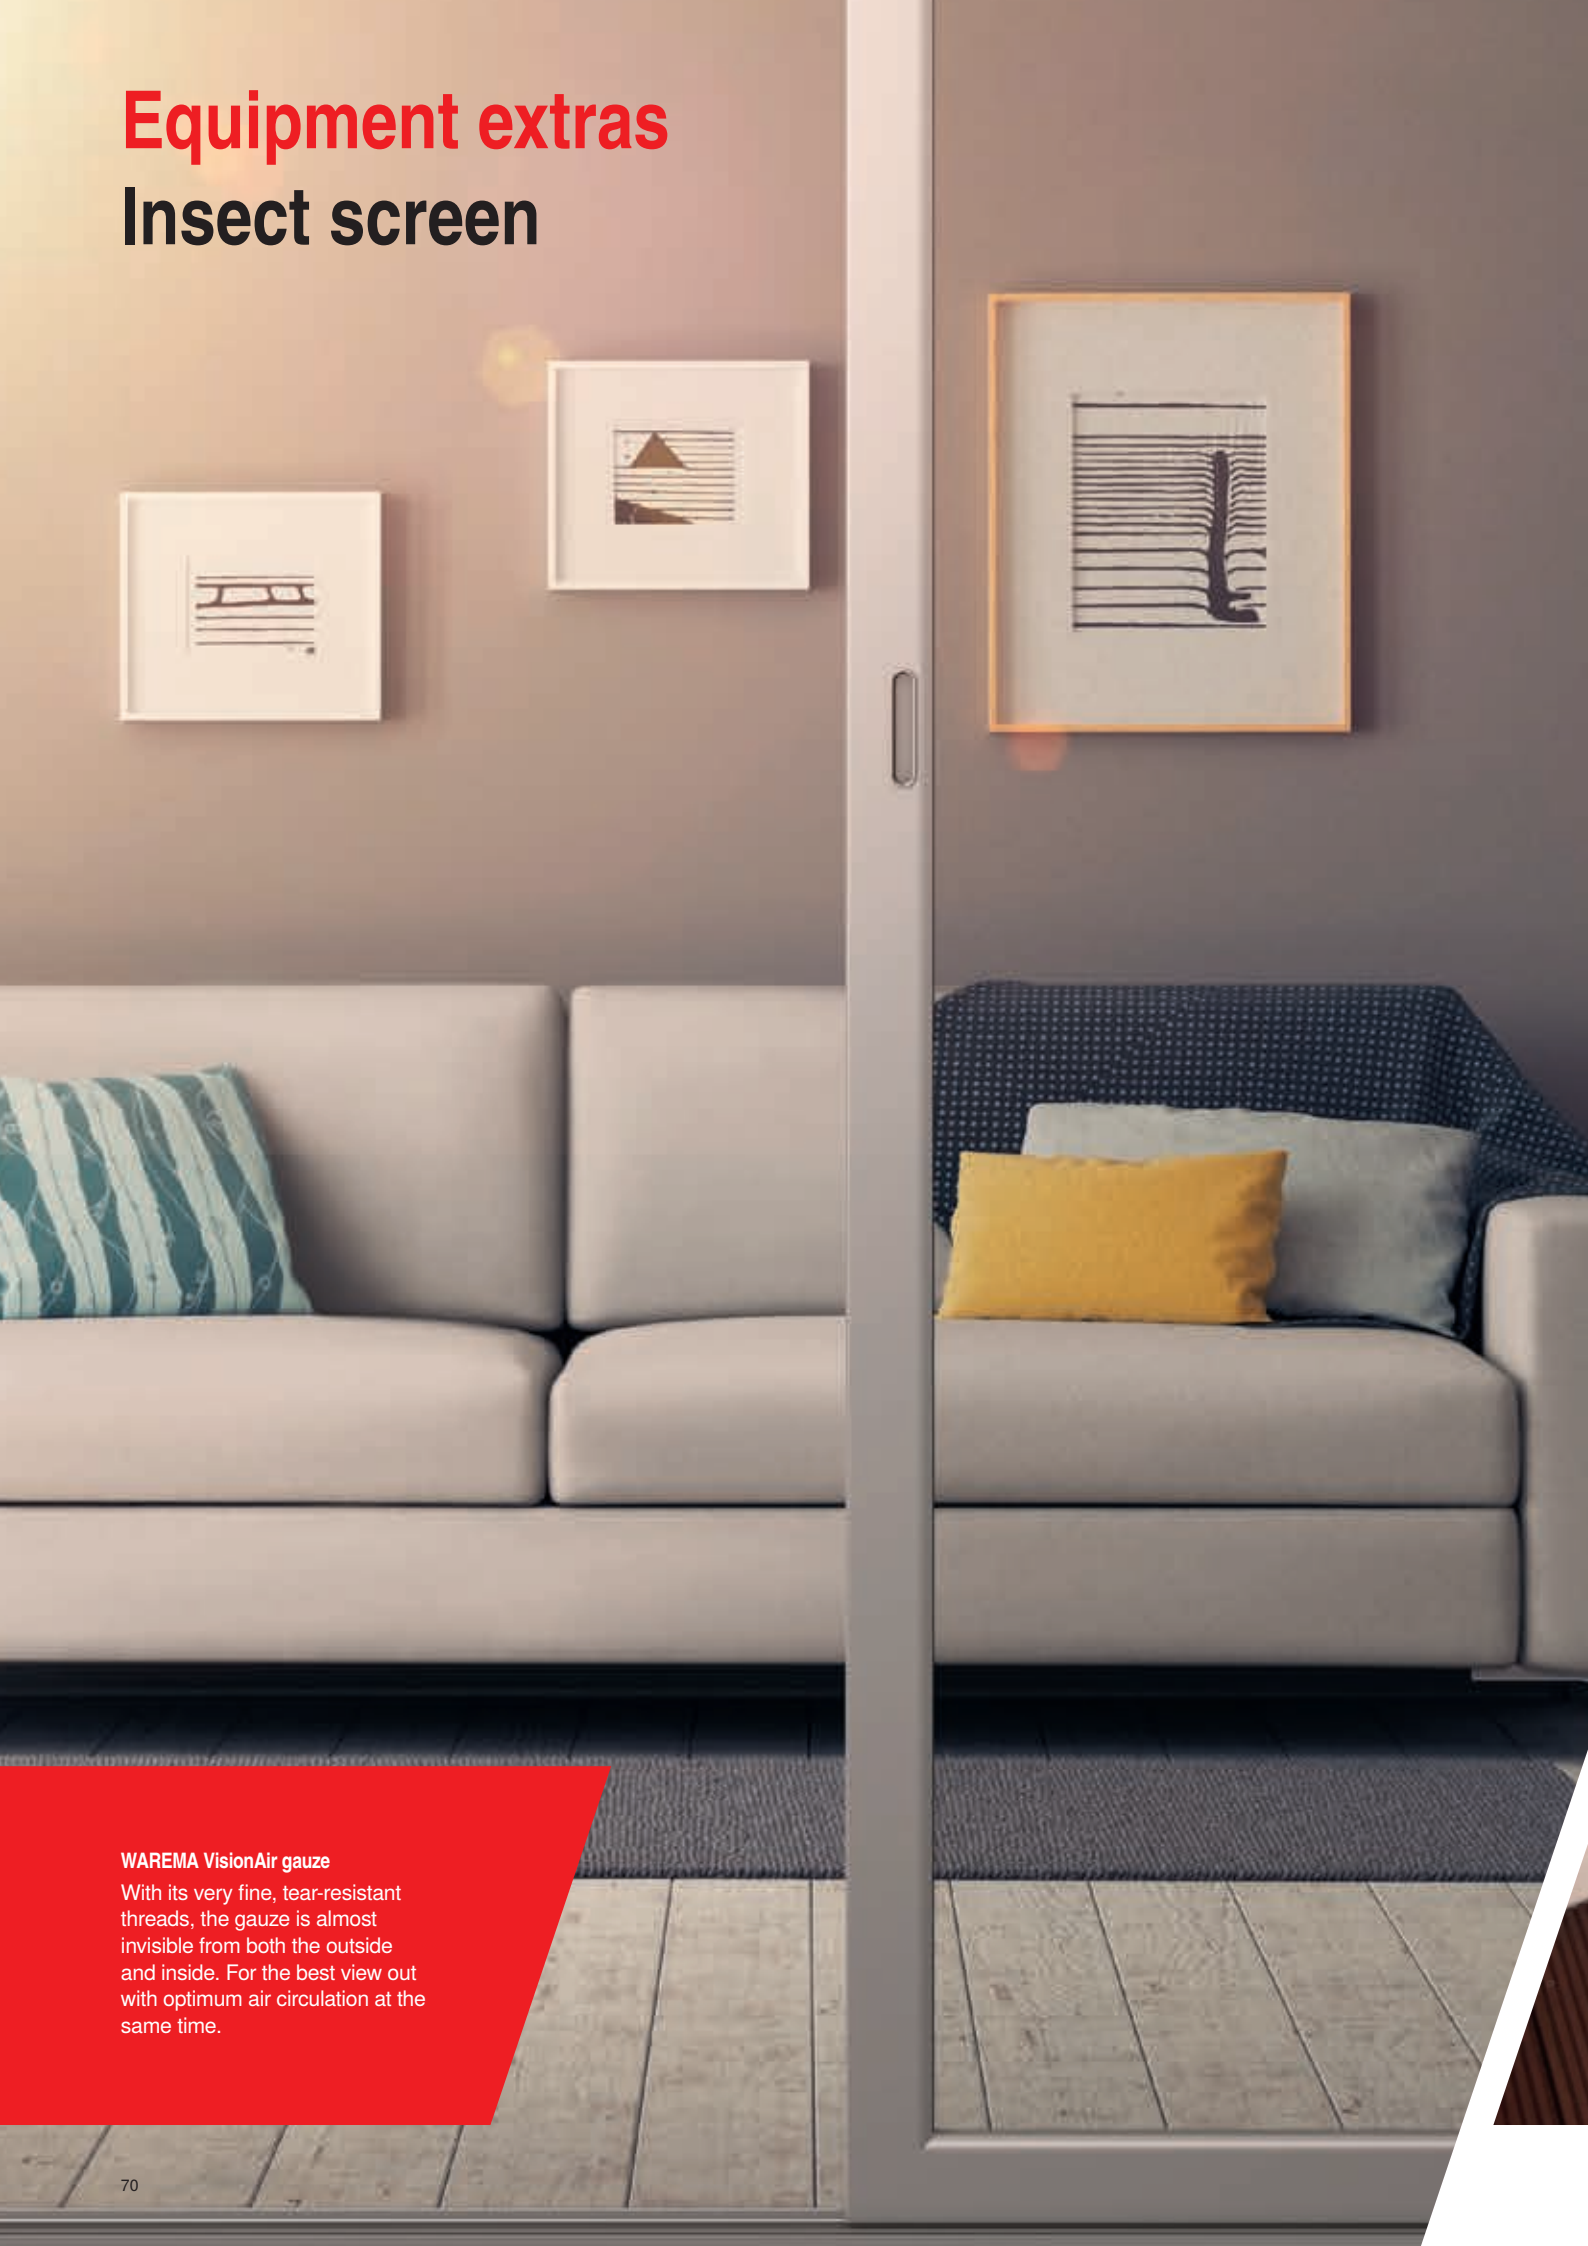

- Closes reliably and tightly
- Cross rail with integrated handle rail for reinforcement
- Flexible operation from inside or outside
- Automatic closing mechanism due to swinging of the door

Max. width	1,300 mm
Max. height	2,500 mm
Max. area	2.5 m²
Operation	Operated by handle rail, the insect screen swinging door automatically swings back to the starting position.
Frame profile	Aluminium, extruded, surface powder-coated
Models	One-wing
Fields of application	Passages to balcony or patio, windows and doors which are opened often
Installation	Installation: with mounting frame on three or all four sides

Equipment extras

Insect screen

WAREMA VisionAir gauze

With its very fine, tear-resistant threads, the gauze is almost invisible from both the outside and inside. For the best view out with optimum air circulation at the same time.

WAREMA VisionAir pollen protection gauze

- Effective protection against pollen
- Colour: black

WAREMA VisionAir fine dust gauze

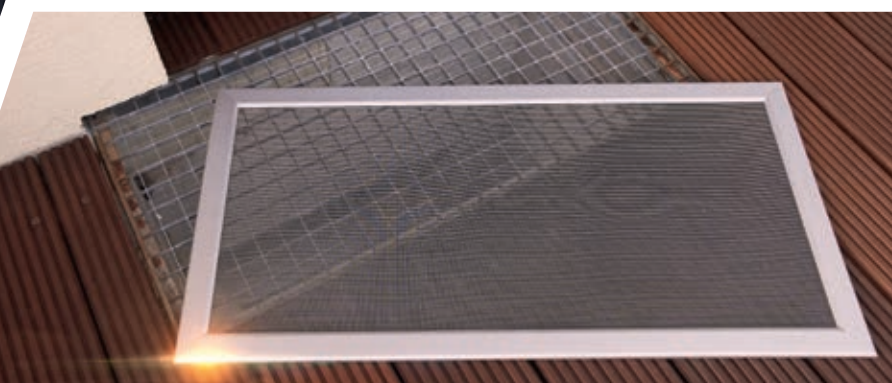

- Highly transparent, tear-resistant fabric
- Effective protection against insects, pollen and fine dust
- Colour: black

Wear-resistant gauze

- Durable polyester mesh gauze
- For heavy wear and tear, e.g. in homes with pets
- Colour: black

High-grade stainless steel gauze

- Suitable for particularly hard wear (e.g. scratching by pets)
- Durable and wear-resistant

Grid for light well covers

- Fine-meshed stainless steel grid
- Keeps out insects, spiders and mice, as well as leaves and dirt
- Installed directly on the existing grid

More supplementary accessories For trendy awnings

More comfort

Choose from a wide variety of components: WAREMA also has the ideal control for your outdoor living product for your requirements – also for retrofitting.

Valance roller blind with motor, battery and WMS Comfort control

The valance roller blind can be comfortably operated by battery-powered motor.

WMS sensor system for secudrive® units

Even in windy conditions, the WMS sensor system for conservatory awnings Climara and pergola awnings Perea offers reliable damage protection. The WMS sensor system is integrated on the guide rail directly ex works.

Integrated control

The WMS components are already built-in ex works. Depending on the type of awning, they are directly integrated in the bearing tube or completely integrated in the shaft housing and connected and can be learned in on request.

Other equipment options

Your boost in individuality

Colour selection

For the powder-coated aluminium parts, you can choose from over 200 attractive powder colours. Our clearly arranged categories Highlight, Variation and Individual make it easier for you to decide. This way, you can find the right colour for your individual awning.

Surface qualities

Five different surface options allow you make the perfect choice to suit your personal requirements. Satin finish has a slightly glossy surface with a smooth profile and optimal light and weather resistance. The matt surface, on the other hand, is distinguished by its smooth matt finish. Fine texture adds impressive effects. The highly weather-resistant finishes are characterised by significantly improved weathering behaviour with regard to gloss retention, weathering, chalking and colour stability. This is available in Matt and Fine Texture options.

Fabric qualities/designs

An array of fabric qualities and designs guarantees you full design flexibility. Create your individual open space with optimum protection thanks to the exclusive and stylish sun sail Sonea.

Even more Outdoor Living products

Perfect variety

With products from WAREMA, you can now make your personal Outdoor Living dream come true. They provide optimum sun shading and weather resistance. Intelligent controls ensure even more comfort.

Thanks to notable manufacturers we can now offer you an even greater variety of solutions for your outdoor living space. Attractive parasols from CARAVITA create stylish accents in your open space. In combination with the functional and aesthetic patio roofing of Solarlux, our Climara awnings offer full comfort.

Patio roofing

Our partner Solarlux offers a multitude of well-designed terrace roofs. The combination with a Climara awning from WAREMA meets every expectation. Discover the options and enjoy your outdoor living space.

Parasols

Parasols from CARAVITA create a very unique ambience in your garden, on your patio or on your balcony. The stable construction provides reliable shading on hot summer days. The LED lighting and radiant heater ensure a real feel-good atmosphere even in the evening and in the late summer. Experience the exclusive CARAVITA ambience www.caravita.eu

Fixed sun sail

With the exclusive products from CARAVITA, we offer an even greater selection of solutions for your outdoor living space. The fixed sun sails create a very unique ambience in your garden, on your patio or on your balcony. Whether free-standing or attached to the house, they are ideal for almost every location of use and are available both in a standard size and made-to-measure. Experience the exclusive CARAVITA ambience at www.caravita.eu

Smart Home

Experience the future

Want to just put your feet up and not worry about a thing? With Smart Home, these dreams will come true. Innovative technology enables sun shading, lighting, heating, household appliances and more to be intelligently networked and easily controlled via smartphone or completely automatically – for a true feel-good home.

With WAREMA control systems, you can always find the perfect Smart Home solution – whether simply through retrofitting, during renovation, or in new buildings.

Find the ideal solution - made in Germany - for your project: www.warema.de/smarthome

Printing errors, changes and deviations from the technical specifications and product presentation are possible due to the individual structural conditions and apply to all the products included in this brochure.

Solutions for a smart home

More comfort

Want to save your hand up to 1,000 movements per year? No problem, because sun shading systems, heating, light and more can be controlled automatically. The sun control lowers the roller shutters when the sun is shining in summer and therefore prevents rooms from heating up.

More safety

Protect what's important to you: your family, your home, but also your personal data. A clever occupancy simulation deters burglars and therefore ensures that your home is safe.

More efficiency

Heating, lighting and sun shading systems control themselves depending on environmental influences, thus saving real money while also protecting the environment. The lights turn off when no one is home.

More user-friendly

Your entire home under control. Whether hand-held transmitters, wall-mounted transmitters or an app - the intuitive operation makes it possible for everyone. Awnings, external venetian blinds and more will listen to your commands with the voice-controlled assistant.

SunLight Management – Because the sun cannot be controlled.

We at WAREMA are passionate about sunlight. We want everyone to be able to create their preferred atmosphere of light and warmth at home and in their workplace. That is why we have developed a complete range of sun shading products for inside and outside, as well as modern control systems and innovative technologies to enable exactly that.

As well as comfort, sustainability is especially important to us in this process. The intelligent sun shading control significantly lowers energy consumption for heating and artificial lighting. We offer the right package for everyone, whatever your individual requirements.

An intelligent solution for every requirement

Home Comfort

An individualised feel-good atmosphere makes life more pleasant. WAREMA external venetian blinds, roller shutters and window awnings ensure the perfect mood lighting inside and leave the heat outside.

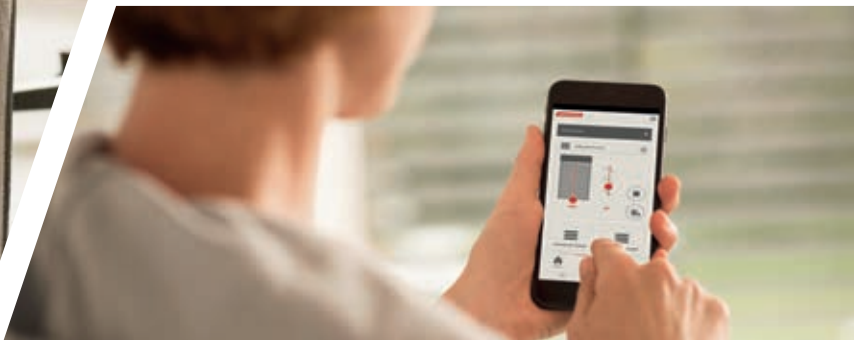

Interior Design

Sunlight is good for you – in the right amount and in the right places. This is guaranteed by the internal sun shading solutions from WAREMA, which are ideally suited to your intended use.

Outdoor Living

With awnings, sun sails or slat roofs, you can use open spaces to relax and extend your living space to the outdoors. This makes your patio, conservatory or green oasis a space where you can live out and feel in.

Smart Home

How convenient to be able to control your comfort at the touch of a button. Intelligent control systems take over operation almost completely, fully automatically and with energy efficiency. Life is easy with WAREMA!

Our service makes all the difference

In order to ensure the best design and the highest quality, we develop and produce our products in Germany and place great value on optimum production conditions. Our demand for perfection is driven by our enthusiasm for engineering and our love of details. Consultation and service are just as important to us. Whether before, during or after your purchase, our combined expert knowledge, a close-knit customer service network and comprehensive sales and planning support guarantee the best individual solution.
