

Top-mounted external venetian blinds for new buildings

Perfect for new buildings and refurbishments

Der SonnenLichtManager

WAREMA top-mounted external venetian blinds for new buildings are built-in together with the window. They are thereby integrated unobtrusively into the facade, enabling them to be combined ideally with WAREMA top-mounted roller shutters for new buildings. A patented guide profile for flush mounting is optionally available: a plaster base plate is integrated between the window and the guide profile. As a result, the external venetian blinds are almost completely hidden in the raised position.

Features

Max. width*	4,000 mm
Max. height*	4,000 mm
Max. area*	16 m ²
Slats	Beaded 80 S mm, flat slats 80 mm, dim-out slats 73/90/93 mm
